

Guide to download Microsoft Office on iPhone, iPod, and iPads:

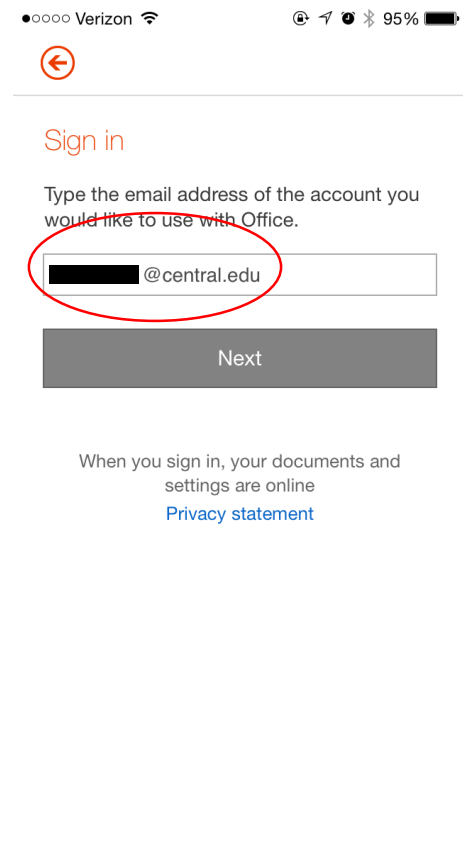

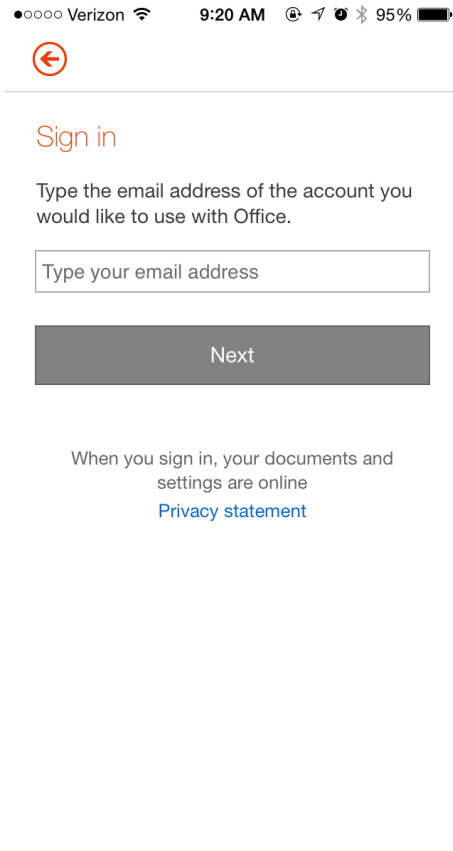

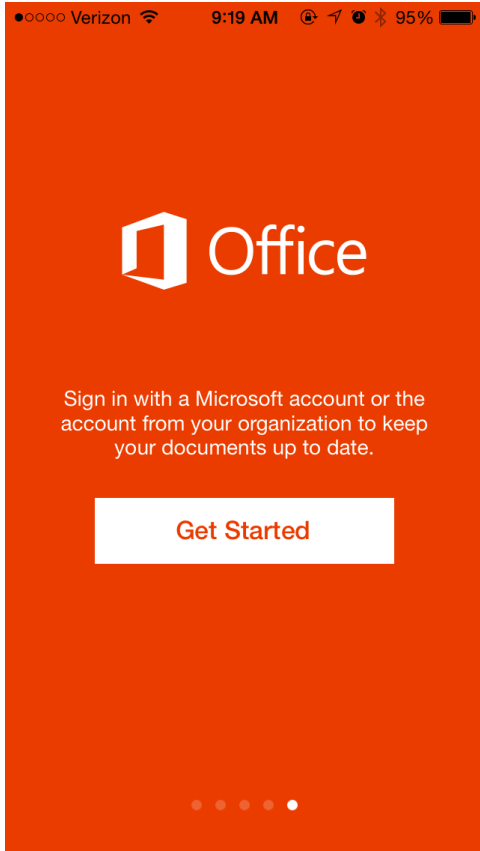

First you will need to go onto the App Store and search for Microsoft Office, which will lead you to this page. Then click on the “Free” Tab and it should prompt you to install the application. (The example here is a cloud because it is already installed on the device).

When you tap install it should begin loading and installing the application on your iOS devices home screen. Once it is done installing Microsoft Office, you will see the Office application (picture 2), tap on that application and you will begin the process of signing in and being able to use Office.

If you scroll all the way over to the right you will see a "Get Started" button. Click that. You will then be prompted to Sign In and for Microsoft to work on your device you must use your central.edu credentials.

If you are prompted with this screen (picture 1) choose Organizational account, this will lead to image 2 where you will need to enter your central **user name** and **password**.
