

How to connect iOS devices to airCentral:

1. First you will need to navigate to Wi-Fi under the settings application on your iOS device (Picture 1). Tap on Wi-Fi and you will be brought to the screen on Picture 2.
2. From here you will choose airCentral.

3. After you choose airCentral you will be prompted to enter your Central **username** and **password** (this is the same username and password you enter to logon to school computers).
4. Once you enter your credentials and tap **Join**, you will be asked to Accept Central's authentication, tap Accept and airCentral will be on your iOS device.
