

## How to connect Windows 7 computers to Central's network:

1. Look at the bottom right of your screen. Click the **Network Icon** that is highlighted in the picture to the right.
  - a. (This icon may have a yellow star, red X, or other symbol over it)
  - b. If this symbol is there, continue to **Step 2**
  - c. If the symbol is not there, skip to **Step 4**

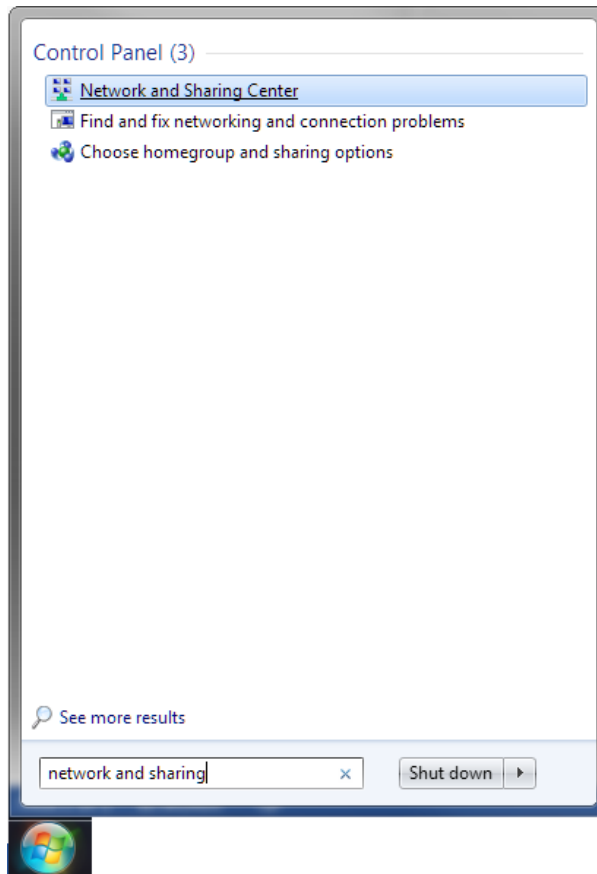

2. Your computer should automatically detect the airCentral network. Click **airCentral** and then click **Connect**.
  - a. Make sure that **Connect Automatically** option is checked

3. Your computer will then connect to airCentral.
  - a. **If a box pops up asking for a username / password**, use your Central College user ID and password.

4. If your network symbol is not appearing, click the **Windows Start button**, and then type **“Network and Sharing”** into the search box. Click on the item shown below:

5. Click **Connect to a network**, and then click **airCentral**. Click **Connect**, and you should be connected to the wireless network.
  - a. For more explanation of this step, see **Step 2**.
  - b. If you are still having trouble, contact the ITS Help Desk at 641-628-7010
